

Community sectors GS-CA engages with

Community is about the wider group of people and organisations we get involved with, in addition to the local authority, company and private clients we serve.

At GS-CA, community engagement is in four sectors:

- Education - support for schools and universities;
- Government - local and central government policy work;
- Professional - quality standards and better practice;
- Charities - fundraising and public contact with buildings.

By working in this way, we believe that we can make the most difference, whether it be to enthuse young designers, support more effective government policy, provide better quality buildings and urban realm or to improve professional practice.

If you would like to get involved in our community, the practice has a **Facebook** page, where views, information, experiences, events, comments and questions can be fielded and shared.

Community is at the heart of what we do. GS-CA engages in four sectors, that together gives financial support and forms a network of people and a body of knowledge to make a real difference in the built environment ...
